

## **CBA Endorses American Burn Association (ABA) Prevention Awareness Initiatives & Guidelines**

Date: February 10, 2026

The Canadian Burn Association (CBA) Board of Directors is pleased to announce the formal endorsement of the American Burn Association (ABA) Prevention Awareness Initiatives & Guidelines.

Following a recent motion, the Board concluded that these guidelines are closely aligned with CBA Standards and represent a gold standard in burn prevention and care. This endorsement reinforces our commitment to harmonizing best practices across North America to improve outcomes for burn survivors and the clinical teams who support them.

### **Why this matters:**

-Alignment of Standards: Ensures that Canadian burn care providers are utilizing evidence-based, internationally recognized protocols.

-Enhanced Advocacy: Provides a unified voice for burn prevention strategies and public awareness campaigns.

-Resource Sharing: Facilitates better collaboration between the CBA and ABA on critical safety initiatives.

We are proud to support these initiatives as we continue to advance the quality of burn care and prevention throughout Canada.
